

SOLV3D Engine is downloaded and installed on to the computer. The application does not require any special hardware to run.

Below are the minimum requirements:

- 4 GB RAM
- 64-bit Dual-Core Processor
- 700MB of Hard Drive space plus additional space for data processing
- Internet connection (required for licence validation when running a function)
- Windows 7 or higher

For optimal performance we recommend:

- 8 GB RAM (or more)
- 64-bit Multi-Core processor
- Dedicated Graphic Card (GPU)
- SSD (Solid State Drive)
